

Replacing a Piston w/ TXV and Evacuation

We get a lot of questions about both evacuation procedure and TXVs so last week we produced videos on both topics including

–

- Before and after testing of piston vs. TXV
- Using the Bluvac Measurequick app
- Use of core remover tools for evacuation
- flowing nitrogen process
- creating an external equalizer port and much more

If you haven't hit subscribe on our YouTube channel yet would you mind taking the time to do it today? it would be greatly appreciated. You can do that [HERE](#)

P.S. – I will be at the Rectorseal booth 2545 in Chicago at the AHR conference on January 23rd at 2PM demonstrating the new [Pro-Fit flaring tool](#). If you are at AHR come by and see me

and sign up for a chance to win a free Pro-fit!
